2020 Microsoft Security System Integrator of the Year

APP MODERNIZATION PROGRAM

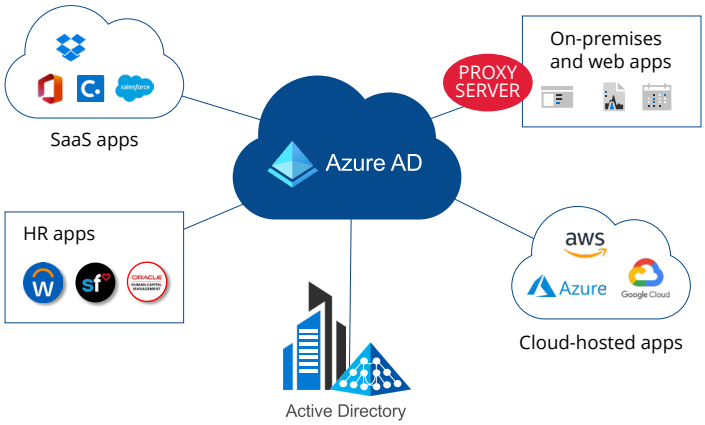
Modern Authentication for Legacy Applications

EDGILE QUICK START PROGRAM

Azure AD / Proxy Server

Microsoft and Edgile have teamed to integrate legacy with modern security controls

Organizations need ways to reduce risk, accelerate modern authentication processes and increase end-user productivity—particularly in today's expansive remote workforce environment. A major challenge in this effort is integrating heavily used legacy applications which may not support modern identity and access management leaving organizations with inadequate controls and inherent risk.



Reduce risk and drive business value

Edgile has partnered with Microsoft to offer a low-risk, low-cost rapid implementation service that can leverage your existing investments in Microsoft 365 Azure AD and a proxy server to support strong authentication and SSO for your enterprise applications.

Reduce Cost	Strengthen Security	Increase End-User Productivity	Drive Cloud Adoption for a Modern Workforce
Increase efficiency and reduce overhead costs by managing on-premises and cloud-based applications from a central location Consolidate application management and security tools for additional savings	Increase overall security posture and mitigate risk by utilizing the Azure platform to enable strong authentication and enforce conditional access policies	Deliver consistent, streamlined sign-on experiences to end users using SSO Enable employee self-service Particularly important for remote workforce	Create a strong foundation for future application modernization efforts Provide end-users with access to more secure cloud and 3rd party applications

Edgile Quick Start Program Overview

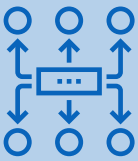
EDGILE
QUICK START PROGRAM
Azure AD / Proxy Server

Edgile's Quick Start methodology allows your organization to quickly validate integration approaches and solutions. A workshop illustrates the modern authentication experience and develops a detailed strategy with next step actions plans. The program is designed as a low-risk, low-cost implementation service that demonstrates quick wins with a quick return on investment.

Edgile goes beyond technical deployment to offer a holistic, strategy-first approach to IAM. We consider business drivers, compliance needs, risk classifications and the operational requirements of a full IGA lifecycle. With an eye on your long-term vision, we use this quick win Proof of Concept and roadmap to create a solution that is technically viable and aligned to your business requirements and risk reduction goals.

Workshop Overview

One day workshop and POC to validate the technical capability of a proxy server and Azure AD.



POC will integrate and show a modern authentication experience for two pre-selected applications and provide a workshop to review the model and next step actions plans.

In-Scope Use Cases and Apps

Authentication from Azure AD to two target applications behind a proxy server

Authentication POC for two existing enterprise applications using following integration methods:

- HTTP Header, Kerberos, OAuth, or form based
- Azure AD as the IdP

Estimated Duration

1 Day

(plus pre-requisite setup)

In-Scope Documentation Task Deliverables

- Summary of POC activities and integrations
- Next steps action plan
