

THE EDGILE PARTNER NETWORK

Edgile + Microsoft

Your Microsoft Security, Identity and Compliance Partner

Why is Edgile a top Microsoft partner?

Edgile is one of Microsoft's premier, trusted partners. We have extensive experience in advising customers and successfully deploying complex digital transformations for large, highly-regulated enterprises—including 27 of the Fortune 100.

Edgile architects and consultants work closely with Microsoft product groups to provide customers with continuous monitoring and analysis of new M365 capabilities.

Information Service Offerings

Zero Trust

- Links identity, security, information, compliance with cloud powered intelligence
- Applies modern protocols for all app access (web, SaaS, legacy)
- Provides a pathway to risk-based access and password-less authentication
- Recovers cost through vendor consolidation

Unstructured Data Protection

- Addresses one of the biggest security risks in organizations today
- Allows organizations to identify risky data and remediate with controls and protections
- Creates ongoing data protection and remediation program
- Builds confidence in data governance enabling advanced analytics and insights through tools like Microsoft Purview

External Identities

- Outsources external identity to industry leader in a Managed Service model
- Secures identities of consumers, clients and partners at unlimited scale
- Consolidates identities to a single platform, one identity across all properties
- Enables decommissioning of the existing tools and reduces CRM and admin support costs

Azure Sentinel

- Cloud native SIEM with event detection driven by cloud signals
- M365 E3/E5 security clients receive free M365 data ingestion (limits apply)
- Enables processing of Microsoft logs often neglected due to cost
- Self managed or Managed Services models available

User Experience

- Recognizes that all users (internal and external) are digital services customers
- Improves employee satisfaction and retention through modern experience
- Streamlines user experience for increased adoption
- Uses modern approaches for experience-based training and self service

Microsoft Advisory Program

- Offers benefits at no cost to the customer
- Provides ongoing guidance and strategy for customers on how and when to consider new Microsoft capabilities and services
- Monitors changes to security capabilities by Microsoft and maps changes into existing customer requirements and backlogs

Edgile unlocks the full value of your Microsoft investments

There's a reason almost every Fortune 1000 company has adopted Microsoft 365 and enabled the power of Microsoft Azure: Microsoft's global footprint and their billions of dollars of security investments protect organizations at a fraction of the cost of other solutions.

Edgile's Microsoft team has deep expertise in security, identity and compliance across multiple industries. We employ a best-in-integration approach that leverages the Microsoft Modern Workplace and Azure platform across three broad practice areas:

Information

We work with enterprise clients to improve their overall security posture and ensure they stay in compliance. Our best-in-integration approach identifies and eliminates unnecessary security tools to simplify the technology environment and reduce costs.

- Microsoft 365 Adoption Planning
- M365/SOC Integration Design
- Data Governance, Azure information Protection Unified Labeling
- Centralized Application Access SSO
- Mobility and Data Protection
- Regulatory Compliance Mapping
- Microsoft Defender Implementation
- Microsoft Sentinel Configuration
- Signals Integration with Current SOC
- Findings Analysis/Issue Remediation
- Application Migration Services
- Data Discovery and Analysis Services
- Licenses Optimization Services
- Managed Implementation Services
- On Call Support
- Custom Expert Advisory Services

GRC

Our dedicated GRC regulatory experts collaborate on our Microsoft projects to help clients understand and manage risk. Our proven models and methodologies create a business case that accelerates modern security adoption.

- Strategy and Roadmap
- Organizational Design
- Risk Management Services
- IT Risk
- Enterprise Risk
- Operational Risk
- Risk Assessment
- ServiceNow IRM Solutions
- Policies and Standards
- Regulatory Framework and Reporting
- KPIs and KRIs
- Finding and Remediation
- Risk and Register
- Vendor Risk Management
- Secure Builds
- Control Plans

Identity

We help clients modernize their security programs by putting identity first. Our teams work across internal identity management, external identities, 3rd party non-employees, extending into Privileged Access Management (PAM).

- IAM Design and Migration Planning
- Zero Trust Implementation
- Password-less Auth Planning
- Privileged Identity Management
- Windows Autopilot Programs
- Azure AD Configuration
- Policy and Risk Based Conditional Access
- Azure Identity Protection
- Entitlements and Attestation
- B2B/B2C Design and Implementation
- Secure Teams for External Collaboration
- Application Onboarding Service
- B2C Managed Transformation
- On Call Support
- Custom Advisory Services
